Confidence leaps as Brisbane lockdown recedes and the Trans-Tasman bubble is announced

- Headline consumer confidence shot past its long-run average value to 114.1 with a gain of 5.9%, reaching its highest value since September 2019.
- 'Current financial conditions' took a huge leap of 8.3%, while 'future financial conditions' rose 4.8%.
- 'Current economic conditions' gained 7.1% and 'future economic conditions' jumped 4.5%. All of these four indices more than made up for the points lost last week.
- 'Time to buy a major household item' improved 5.7%. 'Weekly inflation expectations' rose 0.2% to 3.9%, its highest level since the early stages of the pandemic, but the four-week moving average remained steady at 3.8%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last weekend (10-11 Apr)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
114.1	+5.9%	111.1	112.6	3.8%

This weekly ANZ-Roy Morgan Australian Consumer Confidence Rating is based on 1,455 interviews conducted online and over the telephone on the weekend. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

The receding of the Brisbane lockdown and announcement of the Trans-Tasman travel bubble has seen confidence jump sharply, to above its long-run average and the highest level since late 2019. The jump has occurred despite the delay in the COVID-19 vaccine rollout. In an [article](#) last week we argued that while the direct economic impact of the Trans-Tasman travel bubble might be a small negative, it was likely to be more than offset by the impact on sentiment as the restoration of normality comes at least somewhat closer. These data confirm this expectation.

Consumer confidence bounces back
