Federal voting intention unchanged in mid-March ALP 51.5% cf. L-NP 48.5%

Support for the ALP is unchanged at 51.5% ahead of the Coalition on 48.5% (unchanged) on a two-party preferred basis. If a Federal Election were held now the Albanese Government would be re-elected but forced into minority government with the support of minor parties and independents, the latest Roy Morgan survey shows.

Primary support for both major parties fell with support for the Coalition down 1% to 37% while support for the ALP was down 0.5% to 31.5%.

Support for the Greens dropped 0.5% to 12.5%, One Nation support increased 1.5% to 5.5%, with the biggest increase in support in Queensland, up 2.5% to 8%. Support for Independents was unchanged at 9% and support for Other Parties was up 0.5% to 4.5%.

The latest Roy Morgan survey is based on interviewing a representative cross-section of 1,710 Australian electors from March 11-17, 2024.

Further details will be released in [Roy Morgan's weekly video update](#) presented by Roy Morgan CEO Michele Levine.

About Roy Morgan

Roy Morgan is Australia's largest independent Australian research company, with offices in each state, as well as in the U.S. and U.K. A full-service research organisation, Roy Morgan has over 80 years' experience collecting objective, independent information on consumers.

FOR IMMEDIATE RELEASE

Margin of Error

The margin of error to be allowed for in any estimate depends mainly on the number of interviews on which it is based. Margin of error gives indications of the likely range within which estimates would be 95% likely to fall, expressed as the number of percentage points above or below the actual estimate. Allowance for design effects (such as stratification and weighting) should be made as appropriate.

Sample Size	Percentage Estimate			
	40%-60%	25% or 75%	10% or 90%	5% or 95%
1,000	±3.0	±2.7	±1.9	±1.3
2,000	±2.2	±1.9	±1.3	±1.0
5,000	±1.4	±1.2	±0.8	±0.6
60,000	±0.4	±0.4	±0.2	±0.2
